

## DevOps Report Manager

Instructions for installing the program on Mac

1) Unpack the zip file:

2) Run the DevOps Report Manager.dmg file and in the program window that opens, drag the "DevOps Report Manager" program icon onto the "Applications" folder icon.

3) Download and install the latest Java JDK 8 <https://www.java.com/en/download/>

Attention!

On a Mac, the program will display fonts normally only with the Adoptium version of the JDK.

4) Download and install the latest Java JDK 11  
<https://adoptium.net/temurin/releases/?version=11>
